DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 13-16, 18 and 19 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for compositions comprising silicones, does not reasonably provide enablement for compositions not comprising silicones. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make or use the invention commensurate in scope with these claims. The paragraph bridging pp. 24 and 25 of the specification implies that silicone is an essential ingredient. This should be incorporated into the independent claim.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 19 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The term "the softening agent" lacks antecedent basis. The examiner understands that "a softening agent" was intended, and this interpretation has been used vis-à-vis the prior art.

Claim Rejections - 35 USC § 103

5. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

6. Claims 13-16, 18 and 19 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Dungworth et al., US 6,329,057. See the example at the top of column 11, in which the exemplified formulation is combined with 1.5% by weight of the polymer of Example 5 loaded with the perfume of Example 6. The reference is silent regarding whether or not the perfume is present as a liquid, but it would appear that this is the case as similar materials are being used for the disclosed beads as are being used by applicant. Alternatively, it would have been obvious at the time that the invention was made to have the perfume present in the form of a liquid, because the reference discloses at col. 9, lines 18+ that a mixture of perfume and monomer may be made with is subsequently polymerized. In such a case the perfume would be present in the form of droplets in an emulsion polymerization mixture, and the polymer would form around the droplets.

7. Claim 17 is rejected under 35 U.S.C. 103(a) as being unpatentable over Dungworth et al., US 6,329,057 in view of applicant's admissions in the specification. The Dungworth reference does not disclose the addition of silicone. However, it would have been obvious at the time that the invention was made to do so, because applicants admit at p. 25 of the specification that addition and formulation of silicones is well known in the surfactant art.

Art Unit: 1751

8. This action contains grounds of rejection which were not motivated by applicant's amendments, accordingly, it is NOT FINAL.
